Conclusion/Brief comment:

This application is to erect a one and a half storey detached garage north of the main dwelling.

Initially the garage was located to the northwest of the main dwelling close to the boundary with the road. The road level is lower than the property ground level, so a detached garage close to the roadside boundary would have dominated when viewed from the road. The application was deferred to allow the scheme to be amended. Amended drawings show the detached garage located closer to the eastern boundary, away from the roadside.

The revised location situates the garage to the northeast of the dwelling behind the building line and far enough away from the road for it not to be as noticeable. The proposals achieve a good standard of design, using materials which complement the existing materials. The scale and massing of the proposed garage is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
