OFFICER'S REPORT

Site Description:

The property known as 'No 2 La Bertozerie' is a two and a half storey semi-detached Victorian townhouse which is set back from and faces west onto George Road. The other semi is to the north and there is another neighbour to the south. The property is located within the St Peter Port Main Centre Outer Area and is also within a Conservation Area as defined in the Island Development Plan. The main dwelling is a Protected Building.

Relevant History:

There is no relevant history pertaining to this application.

Existing Use(s):

Residential use class 1: dwelling house.

Brief Description of Development:

This application is to install a rooflight and replace the roof covering to the outbuilding/ sunroom in the southeast corner of the site. The outbuilding/sunroom is not part of the listing as a Protected Building.

Relevant Policies of any Plan, Subject Plan or Local Planning Brief:

GP4: Conservation Areas
GP5: Protected Buildings
GP8: Design
GP9: Sustainable Development
GP13: Householder Development

Representations:

There has been one letter of representation and the issues are:

- The application does not show the development in context in a Conservation Area
- There is no objection to the re-roofing, but the lantern is considered to be too big, with an ornamental spike that is nearly 3 feet high
- The lantern and spike will be directly in the neighbours line of sight and is considered intrusive in design, as a Conservation Area having an (unnecessary) ornamental lantern light on the maximum elevation at this level seems contrary and could set an unfortunate precedent.

Consultations:

None

Summary of Issues:

- Design of the development.
- Impact of the development on the character and appearance of the area.
- Impact of the development on neighbouring properties.

Assessment against:

1 - Purposes of the law.

The objectives of the Law, as set out in Section 1(2), have been considered and this forms part of the assessment of policy issues as set out in 2 below.

2 - Relevant policies of any Plan, Subject Plan or Local Planning Brief.

The outbuilding is set at a slightly higher level than the main house due to the topography of the land, it is single storey with a flat roof and is only just a bit higher than the boundary wall it is built against.

The size and style of the lantern suits the age and style of the main house and is not considered to impact on the character and appearance of the surrounding conservation area, nor is it thought to have any negative impacts on the special interest of the Protected Building.

The height of the glass lantern may interfere with the neighbours view a little, but private views are not a material consideration, and the lantern is not considered to impact on neighbour amenity in any other way.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

3 - General material considerations set out in the General Provisions Ordinance.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application. Where relevant the issues are considered in section 2 above.

4 - Additional considerations (for protected trees, monuments, buildings and/or SSS's).

The proposal would have no impact on Protected Buildings, Trees or Monuments or on SSS's.
