OFFICER'S REPORT

Site Description:

The property known as 'Yanchep' is a mid-20th century semi-detached dwelling which is set back from and faces south onto La Route des Cornus. The other semi is attached to the east and there is another detached dwelling to the west and across the road to the south and to the north is an open agricultural field. The property is located Outside of the Centres as defined in the Island Development Plan.

Relevant History:

There is no relevant history pertaining to this application.

Existing Use(s):

Residential use class 1: dwelling house.

Brief Description of Development:

This application is to demolish the rear extension and replace it with a slightly larger single storey flat roof extension.

Relevant Policies of any Plan, Subject Plan or Local Planning Brief:

GP8: Design

GP9: Sustainable Development

GP13: Householder Development

Representations:

There has been one letter of representation and the issues are:

- The height of the proposed extension extends significantly above the existing extension due to the flat roof design. The extension will therefore not only be highly visible from the neighbours property, but will significantly reduce the

natural light into the neighbours kitchen at the rear of the property and onto the neighbours patio.

- The finish of the northeast elevation. There are no details of materials on the drawings submitted. There is concern as to the appearance of the finish which, if not consistent and/or sympathetic to the property's existing extension, would be detrimental to the character of the property and its neighbours.

Consultations:

None

Summary of Issues:

- Design of the development.
- Impact of the development on the character and appearance of the area.
- Impact of the development on neighbouring properties.

Assessment against:

1 - Purposes of the law.

The objectives of the Law, as set out in Section 1(2), have been considered and this forms part of the assessment of policy issues as set out in 2 below.

2 - Relevant policies of any Plan, Subject Plan or Local Planning Brief.

The extension is a single storey flat roof extension, with a parapet and green sedum roof covering. Due to the makeup of the roof, including the green roof details, the height of the extension is a little higher than normal. Whilst the increase in height along the boundary would result in additional overshadowing of the adjacent property to the north-east, the extent of increased impact when considering the existing situation would not be sufficient to warrant refusal of the application.

The proposals achieve a good standard of design, using materials which complement the existing materials, confirmed via email with the agent. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

3 - General material considerations set out in the General Provisions Ordinance.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application. Where relevant the issues are considered in section 2 above.

4 - Additional considerations (for protected trees, monuments, buildings and/or SSS's).

The proposal would have no impact on Protected Buildings, Trees or Monuments or on SSS's.
