OFFICER'S REPORT

Brief Description of the site:

The property known as 'La Croute' is a two storey Georgian dwelling which has been added to over the years. By the early 2000's the property has been split into two, with a small dwelling and shed to the south of the property sold on. The main house faces north with the driveway coming from the southeast. The nearest neighbour is to the south (once part of the site), La Planque Lane runs along the west boundary, there are open fields to the east and west across the road and to the north across the road, Route des Bas Courtils. The property is located Outside of the Centres as defined in the Island Development Plan.

Conclusion/Brief comment:

This application is to demolish the existing lean-to and conservatory, and erect a one and a half storey extension and single storey porch, re-clad part of dwelling and garage block.

The front of the historic main part of the dwelling, where the conservatory is, will be replaced with a smaller more traditional style of porch, that is more appropriate for the age and style of the property.

The east 'wing' of the property will be updated with new cladding and new windows, but the overall layout will remain the same.

The majority of the work will be to the rear of the property, where the smaller lean-to will be removed and the one and a half storey section will be erected. As this is at the rear of the property it will only be seen in limited views (if at all) from any public vantage points, the design complements the existing structures with a pitched roof and using the same materials as the wing and garages. The proposals will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on the immediate neighbour to the south. There will be one additional first floor window looking south, but it has been agreed that this window will have opaque glazing to negate any overlooking, this can be conditioned. One first floor window looks east, but it has a timber slated treatment in front of it so that it is difficult to look south from the window, alleviating any overlooking issues.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
