Consultations

The Office of Environmental Health and Pollution Regulation.

"I have reviewed the proposed plans for the installation of an air source heat pump at

La Bernauderie, Les Landelles, Castel, Guernsey, GY5 7DH which were received via email on 28th June 2022. I have carried out a distance calculation and believe that the pump is unlikely to have any adverse impact on the surrounding area, to ensure that this is the case I would recommend that the following condition is attached to the consent:

Noise associated with air-source heat pump, the Rating Level, measured or calculated at 1- metre from the façade of the nearest existing noise sensitive premises, shall not exceed a level 5 dB(A) below the existing LA90 background noise level, including low frequency tones. Rating Level and existing background noise levels shall be determined as per the guidance provided in BS 4142:2014."

Conclusion/Brief comment:

The application is acceptable in relation to the above policies and other material planning considerations.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
