OFFICER'S REPORT

Brief Description of the development:

Installation of two interpretation boards to the north and east ends of a public walk. The boards will be supported off a granite base and provide information on the area. The north sign will be within an area defined as a SSS whilst the east will be in a area defined as outside the centre.

Policies considered most relevant:

GP2: Sites of special significance
GP8: Design.

Conclusion/Brief comment:

Although the north sign will be placed on land defined as a SSS this will not involve the breaking of any ground or disturbance. The nature of the works is minor consisting of a granite base with the board fixed to this via poles. The development would therefore not have any impact on the SSS and a screening opinion is not necessary in this instance.

The design of the two boards are similar to those positioned in other sensitive areas around the Island and is acceptable.

The application is acceptable in relation to the above policies and other material planning considerations.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
