Conclusion/Brief comment:

This application is to erect two dormer windows to the east front roof slope and one dormer window to the west rear roof slope.

Due to the rural nature of the local area and the distances between properties, the dormers will not overlook any neighbouring properties. They are of a design which suits the property, pitched roof dormers on the front and a flat roof dormer to the rear.

The scale and massing of the new dormers are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impacts on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
