(5) Planning permission is only permission to carry out the development specified in it (subject to any conditions so specified), and does not imply the giving of any other approval or consent required under this Law or any other enactment or under any rule of law.

Right of appeal against planning decisions:

The property is located Outside of the Centres as defined in the Island Development Plan.

Conclusion/Brief comment:

This application is to erect a one and a half storey extension with dormer window and balconies to the rear north elevation, and to install two rooflights to the existing single storey west extension.

The proposals achieve a good standard of design, using the style of the dwelling to inform the shape and style of the extension and using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation, including an incorporated dower unit within the ground floor.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, it will not be seen from many public vantage points and the rear garden boundaries are a minimum of 2m in height in each direction.

The proposals are not thought to have any detrimental impacts on the neighbour to the west, because of the orientation of the two dwellings the rear first floor windows have no views into the neighbours private amenity space. If someone stood on the study balcony and looked directly west they would look over the neighbours parking area and there is over 15m to the neighbouring facade.

The proposals are not considered to impact on the setting of the protected building to the east as the building is over 150m away with a great deal of mature planting in between.

The dower unit accords with policy as it is integrated within the ground floor of the dwelling, it has a small kitchenette, and internal links with the main dwelling and shares internal facilities, the garden and parking.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
