GP9: Sustainable development

Conclusion/Brief comment:

This application is to increase the size of the previously approved bin store and convert it to an enclosed bicycle store and change the mono pitch to a flat roof.

There has recently been an application to relocate the bin store to an area south of the newly built home and to the east of the car park, which is an easier location for the bin trucks to access (see history above).

The location of the new enclosed bicycle store is much closer to the building, near the landscaped area in front of the new west entrance, which is more convenient for use.

The new store is not much bigger than the previously approved structure and therefore it is not thought to have any detrimental impacts on the special character of the surrounding conservation area, nor will it impact on the special interest of the protected building.

The proposals will not affect neighbour amenity and are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
