OFFICER'S REPORT

Brief Description of the site:

The application site is located Outside of the Centres as designated in the Island Development Plan.

Planning permission is sought to demolish a conservatory, erect a single storey extension to the south (side) elevation, install cladding and make alterations to the fenestration. The application also includes removing hedges, installing fencing and gates and widening the vehicle access to the front (north-east) of the property.

The application was deferred over the width of the proposed vehicle access and the loss of boundary hedging.

The agent has amended the drawings and reduced the total width of the access to 4.5m in attempt to overcome the concerns raised.

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The proposed extension adopts a good standard of design by virtue of its scale, form, massing, siting and materials. Due to its position and design, the proposal will not have a detrimental impact on the character of the area, visual amenity, or the amenities of neighbouring residents.

In light of the amendments secured, the proposed width of the vehicle access is in keeping with the majority of other vehicle accesses on the clos that have either been granted planning permission, or have remained unchanged since the respective property was built.

Consequently, the alterations to the access, together with all other alterations to the dwelling, are supported under Policy and would not lead to any undue harm to the character or appearance of the Clos.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
