Conclusion/Brief comment:

This application is to erect a first-floor extension to the rear north elevation. A previously approved application allowed for the main roof to be removed and the northwest half of the building to be extended at first floor level over the existing ground floor extension. This application is to erect the northeast half of the building at first floor level.

The proposals achieve a good standard of design, giving more symmetry to the north facade, and using materials which complement the existing materials. The extension

will provide adequate levels of sunshine and daylight and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
