OFFICER'S REPORT

Brief Description of the site:

The application site comprises a large detached dwelling-house located Outside of the Centres and within an Agriculture Priority Area as designated in the Island Development Plan.

Planning permission is sought to demolish a section of the roadside wall/earth bank to create an additional vehicle access to the property.

Concerns were raised over the design of the additional gated access with regards to its effect on the character and appearance of the rural environment, together with the lack of justification for the proposed development.

In response, the agent has amended the drawings and has reduced the height of gate pillars, omitted solid gate and incorporated a 5 bar agricultural style gate. The agent has also provided justification, noting that the proposed access is for service and maintenance of the grounds of the site as it enables easier access, particularly for large plant and machinery, when compared to the existing access to the rear of the site which has restricted width and a sharp change in topography.

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

Based on the justification provided, the principle to create an additional vehicle access within the recognised domestic curtilage of the site, in this particular case, is supported under Policy GP13.

In light of the amendments secured, the design of the proposed vehicle access and gate pillars will be subservient to the main access and be less visually prominent in public views. By comparison, the proposed access will be similar to that of an existing access serving agricultural land which is located within a short distance of application site. The design adopted is more sensitive to the character and appearance of the rural environment when compared to the original scheme.

Despite the gate being positioned on the roadside boundary, rather than being setback into the site, the proposal is not considered to result in any significant road safety or traffic management concerns when taking into account sightlines, traffic speeds and volumes along Route De La Clos Au Compte, and the low intensity of traffic using the proposed access as set out in the agent's letter dated 10th October 2022.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
