Conclusion/Brief comment:

This application is to extend and alter the roof form from hipped to gable pitched with a dormer and rooflight to the front and rear roof slopes to create a second floor bedroom and to install an external insulating render system.

Policy GP8, amongst other things, expects new development to achieve a good standard of architectural design, to make the most effective and efficient use of land and to respect the character of the local built environment. It highlights that multi-storey buildings are a more efficient use of land than single storey buildings and it states that development proposals should consider a multi-storey design from the

outset, unless there are overriding reasons why this design approach would be unacceptable within a particular locality.

The proposals achieve a good standard of design, using materials which complement the existing materials. Although the proposal would alter the symmetry of the terrace development the additional space addresses the matter of efficient and effective use of land. The scheme will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new roof form is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any significant impact on either of the immediate neighbours.

The dormer to the rear would look over the rear gardens, but it is not thought to increase the overlooking which already exists from the first floor windows, certainly not enough to warrant a refusal.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
