Conclusion/Brief comment:

This application is to erect a first floor extension over the existing flat roof single storey rear extension to house a master bedroom and ensuite. Remove and replant the west boundary hedge and widen the existing vehicle access from 2.4m to 3.1m.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours. As there are already first floor windows to the rear of the property the new first floor juliette balcony is not considered to significantly increase the impact of overlooking which already exists.

The new south facing first floor window services a bathroom and so will have opaque glazing, the window will have a top hung opening light to mitigate any possible overlooking. A condition will be added to ensure there is no additional overlooking from the proposed bathroom window.

The widening of the vehicular entrance and replacement hedging would have no adverse effects on the character and appearance of the surrounding area, nor will it impact on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
