Conclusion/Brief comment:

This application is to erect a single storey flat roof extension and a flue to the west rear elevation, install an external insulating render system, some alterations to the fenestration and erect a single storey pitched roof outbuilding close to the south boundary to the rear of the property and finally to widen the existing vehicular access by 1m to 4.2m.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Widening the existing access to 4.2m will have no adverse effects on the character and appearance of the area and is likely to be an improvement to highway safety.

There are no other outbuildings on the site and due to its siting and single storey nature the outbuilding is deemed acceptable.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
