To the northeast is a neighbouring property, which faces Rue des Rocques. There are other neighbours to the northwest. Conclusion/Brief comment:

This application is for a variation to the previously approved application, FULL/2021/1557, to alter part of roof form to a pitched roof and to alter the floor area to the rear and side and some alterations to the fenestration.

The altered proposals still achieve a good standard of design, using materials which complement the existing materials. The altered extensions will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the newly altered extensions are not considered to have a detrimental effect on the character and amenity of the surrounding area.

The proposals are to the north and east of the house and so will not be seen from the conservation area, therefore the special quality of the surrounding conservation area will remain intact.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
