Conclusion/Brief comment:

This application is to erect a one and a half storey extension to the east side elevation, housing a covered patio below and a master bedroom above. Enlarge the two dormer windows on the rear extension. Install rooflights and create a balcony at first floor level to the north rear elevation and install rooflights to the south front elevation. Finally install an external insulating render system.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impacts on any of the neighbours, due to the distance between the dwelling and the neighbouring properties.

Increasing the dormers would not increase the amount of overlooking to a level which would mean a refusal, as the window size for the dormer window to the west will remain the same. The balcony would overlook the open land to the northeast and would not have any impacts on neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
