Conclusion/Brief comment:

This application is to demolish the rear lean-to extension and install a slightly larger flat roof rear extension, install one flat roof dormer to the rear roof slope and two smaller flat roof dormers to the front roof slope, and demolish a section of roadside boundary wall to widen the vehicular access.

The proposals achieve a good standard of design, using materials which complement the existing materials. The development will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impacts on the special interest of the adjacent protected building or on the amenities any of the immediate neighbours.

The rear dormer window will be located further east than the existing dormer, which lessens the opportunity for overlooking. The outlook is mostly northward down the garden, and only over the bottom of the neighbours garden, which maintains the private amenity space close to the house. Overall the rear dormer window is considered to be acceptable.

The property is located within a Conservation Area and the scheme was amended to limit the loss of the roadside boundary wall. Initially the application proposed a 6m opening across a 13.7m frontage. The existing opening is 4.2, and as amended the opening will be enlarged to 4.7m which is considered acceptable in this case.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
