OFFICER'S REPORT

Brief Description of the site:

Planning permission is requested to refurbish existing timber windows and replace existing PVCu windows and doors with timber.

The whole of Les Caches house is protected together with several barns and outbuildings. The site is located Outside of the Centres.

Conclusion/Brief comment:

The alterations relate to PVCu windows which detract from the special interest of the building. Their replacement in timber is supported as an enhancement to the protected building, subject to agreement of large-scale elevation drawings at 1:20 scale, this can be dealt with by condition. In this respect, whilst typical large scale elevations of the windows have been submitted, they do not appear to represent the window openings present on site, which also differ from one another, for example the proportions of the large scale elevations do not appear to match the proportions of the openings. The replacement windows and doors must be of a style appropriate to the building and should not automatically reflect the style of the existing late 20th century insertions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The application is acceptable in relation to the above policies and other material planning considerations.
