Conclusion/Brief comment:

This application is to remove the render from the south side elevation and to erect a section of roadside boundary wall which completes the east wall with the road, and curves round onto the site finishing the front garden wall in line with the north elevation.

The proposals do not raise any concerns with regard to Policies GP4 and GP5. The removal of the existing paint and render from the south gable would have no adverse effects on the special interest of the protected building, provided any necessary re-pointing is completed using a lime-based mortar. This can be conditioned.

Provided the stone is of a type, colour, texture and method of laying to match the roadside wall then continuing the roadside wall along the north side of the front garden is supported.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
