Conclusion/Brief comment:

This is a variation to a previously approved application, FULL/2022/0991, for some alteration to the fenestration. Specifically letting the south facing windows wrap around to show a full length window on both the east and west elevations.

There were possible overlooking concerns to the east. However, a site visit was carried out and the boundary wall in the location of the new full length window on the east elevation is at a height of 2m, which means there will not be any overlooking into the neighbours garden.

The new glazing layout will not affect the character of the area, nor will it impact on any neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
