Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The proposed design through the mix of single storey and two storey flat roof extensions will provide a contemporary approach to the dwelling, coupled with a mix of larch cladding and external render.

Overall, the proposal adopts a high standard of design by virtue of its scale, form, massing, siting and materials. The extensions and alterations proposed have been sensitively designed that respect the character and appearance of the surrounding area, the amenities of neighbouring residents, whilst improving the quality of the accommodation and offering more accessible and adaptable accommodation.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
