Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The site is within a Conservation Area designated in the IDP. It is a requirement under the Land Planning and Development (Guernsey) Law, 2005, when considering

applications affecting Conservation Areas, to secure so far as possible that the special historic, architectural, traditional or other special characteristics are preserved. This is reflected in Policy GP4 which supports development that conserves, and where possible, enhances the special character, architectural or historic interest and appearance of the particular Conservation Area.

Removal of the section of roadside boundary wall as previously proposed would have had an unacceptable negative impact on the character and appearance of the Conservation Area, contrary to Policy GP4. However the application has been amended during consideration to propose construction of a replacement section of wall at the eastern end of the opening. Considering this amendment, and having regard to the restricted width of the existing access and all other relevant circumstances in this case, it is concluded that the proposal would not have an unacceptable detrimental effect on the character and appearance of the Conservation Area, subject to provision of the replacement section of wall as proposed.

On balance, the application is acceptable in relation to the above policies and other material planning considerations.
