OFFICER'S REPORT

Brief Description of the site:

Vakkaru, La Route Des Cornus is a detached bungalow set back from and elevated above road level. A flat roof garage exists to the side/east of the dwelling.

Rooflights are proposed to both the front and rear roofslopes along with alterations to raise the height of the ridge in connection with the use of the roofspace as additional habitable accommodation to provide a master suite and another bedroom and bathroom. The alterations to the ground floor window openings in the rear/north elevation constitute exempt development and do not require the specific grant of planning permission.

The site is located Outside of the Centres as designated in the Island Development Plan.

Conclusion/Brief comment:

The design and appearance of the proposed works represent a good standard of design that respects the local built environment. The proposed works will offer more flexible and adaptable accommodation and makes more efficient use of the site by

introducing multi-storey accommodation. The scheme offers adequate sunlight, daylight and outlook from the proposed accommodation having regard to the health and well-being of occupiers.

The limited increase in the height of the roof will not result in unacceptable overshadowing or loss of light to the occupiers of surrounding dwellings. Given the position of the rooflights in relation to surrounding residential properties these alterations will not result in unacceptable overlooking or loss of privacy to adjoining occupiers.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

In view of the above it is recommended planning permission is granted for the proposed development.
