Conclusion/Brief comment:

This application proposes the demolition of the laundry room building which previously linked the northern and central blocks of accommodation, and the construction of a new one bed unit in its place. The laundry room is stated to no longer be required, as each unit is fitted with clothes washing facilities.

The principle of new housing within the Local Centres can be considered under IDP Policy LC2, and this proposal is considered to be acceptable in terms the size of the Local Centre concerned.

The proposed building is considered to be acceptable in design terms, being of a form and design appropriate to its context and remaining subservient to the attached building to the south, and would not have any adverse impact on the character of the area. The proposed accommodation would be accessible and adaptable. The unit would be set away from residential property outside of the site boundaries and would maintain an appropriate relationship with existing and approved units within the site. The application is therefore considered to comply with the aims and objectives of Policy GP8.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations and a Site Waste Management Plan is provided, in accordance with Policy GP9.

Adequate parking provision is available on site, in accordance with the requirements of Policy IP7.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
