Conclusion/Brief comment:

This application is to erect a single storey flat roof extension to the rear north of the property, install a flue to the east side roof slope, alterations to the fenestration and remove the east pillar and nib of wall from the vehicular entrance. Plus install cladding to each elevation of the building.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

The cladding, flue and alterations to the fenestration are all considered to be appropriate changes and accord with policy.

The pillar and nib of granite wall are not in line with the rest of the roadside boundary, but set slightly onto the site, and their removal is considered to help increase visibility for the homeowners.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
