Conclusion/Brief comment:

The existing extension is of no particular merit to warrant its retention. The single-storey flat roof extension proposed represents a sufficiently high standard of design that respects the local built environment, within a Conservation Area, being situated to the rear of the dwelling and not highly publicly visible.

The proposed extension will not have an adverse impact on residential amenity with regard to overshadowing. The relationship with adjoining neighbours will not substantially alter as a result of the ground floor fenestration now proposed in all elevations and which can be screened by way of planting or exempt boundary treatments. The proposal will not result in unacceptable overlooking or loss of privacy to surrounding residential occupiers.

With regard to Policy GP9: Sustainable Development, it has been demonstrated that the proposed development will comply with Building (Guernsey) Regulations 2012 and therefore has taken into account the use of energy, resources and any adverse impact on the environment.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

In view of the above it is recommended permission is granted for the proposed extension.
