Conclusion/Brief comment:

The application proposes the erection of a subservient pitched roof extension to the side/south of the dwelling to provide an open plan kitchen/family room on the ground floor and two bedrooms on the first floor. The scheme has been designed with a render and timber clad exterior to reflect the external appearance of the existing dwelling.

The proposed extension represents a good standard of design that respects the local built environment. The scheme proposes multi-storey development which represents efficient and effective use of land and offers occupiers flexible and

adaptable accommodation that can respond to their needs over time. The extension also provides occupiers with adequate sunlight and daylight.

As an existing two-storey dwelling there are existing first floor windows facing east, west and south. The extension will introduce additional first floor windows however those to the east and south will face a road and open land. With regard to those in the west elevation these will face towards the side elevation, with one first floor window (likely to be a landing window) and parking area of the neighbouring dwelling and overlooking will remain within acceptable limits.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

In view of the above it is recommended permission is granted for the proposed extension.
