Conclusion/Brief comment:

This application is to raise the roof ridge height and install replacement dormer and rooflight on the rear roof slope, all to upgrade the thermal element of the building.

A reasonable Statement of Significance has been submitted and the proposals are considered to comply with policy GP5.

The roof slates will be replaced, but the dormer and roof light will be replaced in a 'like for like' manner. Although it is only the exterior of the property which is protected, the proposals are not thought to impact on the special interest of the building, they will not have any detrimental impacts on the special quality of the

character and appearance of the surrounding conservation area, neither will they have any effects on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
