Consultations:

The Office for Environmental Health and Pollution Regulation.

'I have reviewed the proposed plans for the installation of an electrical kiosk and floodlights to the east boundary wall of the above site. I do not wish to raise any objections or make any recommendations to the proposals.'

Conclusion/Brief comment:

This application is to install an electrical kiosk on the east boundary approximately 1.2m from the ground and erect two LED floodlights to the existing east boundary wall, 4m above ground level.

Sarland Yard is surrounded by very high granite boundary walls on all sides, the proposals are all within the site and will not be seen from any public vantage points, therefore the proposals are not considered to have any impacts on the character and appearance of the surrounding conservation area. The special interest of the protected building is not considered to be affected and there will be no detrimental impacts on any neighbouring properties.

The east boundary wall is not part of the listing for protection and so fixing the kiosk and floodlights to the wall is not considered to be an issue.

The proposals are considered minor in nature and would not prejudice the outcomes of or inhibit the implementation of a Local Planning Brief and are considered to accord with all of the relevant policies of the Island Development Plan.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
