Consultation:

States Archaeologists: Due to the location of the property being close to the West Battery of the Citadel at Fort George, there may be some remaining features or finds pertaining to the Fort. the foundations will be of a large enough size to suggest there is a likelihood of archaeological remains being disturbed. Please note that should any finds be found you should get in touch with the Assistant Archaeologist.

Conclusion/Brief comment:

This application is to erect a timber frame double garage with shallow pitched roof in the northwest corner of the site, doors facing south onto the drive.

The garage is located forward of the building line, but in this instance the front boundary consists of an over 2.2m high hedge and a 1.8m high central solid sliding entrance gate, which would screen the proposed garage. The property is located within Fort George, where many properties have high front boundaries. It is noted that the existing high hedge may be reduced in height without requiring permission and the existing dwelling also projects forward to the west/roadside boundary.

On balance the proposed garage is not considered to have a detrimental impact on the visual amenity or on the character of the area, nor will it impact on neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
