Conclusion/Brief comment:

This application is to replace a single external door to double sliding doors at first floor level and alter the external steps at ground floor under the balcony on the south elevation of the converted barn, plus add a 1.5m roller door at ground floor level.

Altering the size of the first floor door is considered acceptable because the balcony already exists and there are no additional issues of overlooking. Altering the ground floor steps and adding the roller door are also considered acceptable.

None of the proposed works will have a detrimental impact on the character of the area nor will they have any effects on neighbours amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
