Conclusion/Brief comment:

This application is to erect a single storey pitched roof timber frame and glazing pool room extension to the west elevation of the converted barn, which is located along the eastern boundary. Install timber cladding to the converted barn and some alterations to the fenestration of the converted barn.

The proposals achieve a good standard of design, using natural materials which complement the existing granite of the main dwelling. The pool room extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible entertainment space.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
