OFFICER'S REPORT

Brief Description of the site:

The application site comprises a detached dwelling-house located on the corner between Les Grippios and Petit Hougues. The property is located Outside of the Centres and is within a Conservation Area as designated in the Island Development Plan.

Planning permission is sought to raise the boundary walls to the north-east of the property and to create a car port. The garage/carport will feature a flat roof rooflight above. The area in question is currently used as a car parking area associated with the property.

The application was deferred as some concerns were raised over the detailing of the roadside wall along the east boundary and its effect on the character and appearance of the Conservation Area. In response, the agent has incorporated a scalloped section to replicate the existing wall detail in attempt to overcome the concerns raised.

Conclusion/Brief comment:

Under Section 38 of The Land Planning and Development (Guernsey) Law, 2005 the Authority has a duty to pay *“special attention to the desirability of preserving and enhancing the character and appearance”* of Conservation Areas. This duty is encapsulated in Policy GP4 (Conservation Areas) which states that *“proposals for development within a Conservation Area will be supported where the development conserves and, where possible, enhances the special character, architectural or historic interest and appearance of the particular Conservation Area.”*

Raising the boundary wall in natural granite will minimise public views of the proposed GRP flat roof to the point that the degree of harm to the Conservation Area would be limited. The only area that the flat roof would be visible in the public realm is towards the vehicle access.

Provided the raised sections of the roadside wall match that of the existing wall in terms of its method of laying, pointing, colour etc, the proposal alteration will have a negligible effect on the character or appearance of the Conservation Area as the car parking area is ‘read’ separately from the main house. The incorporation of the scalloped section is a welcomed and needed addition to the scheme in order to take into account the detailing of the Conservation Area.

For the purposes of Policy GP4, the proposal is considered to conserve the character and appearance of the Conservation Area, subject to conditions.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
