Conclusion/Brief comment:

This application is to demolish the existing extension and outbuilding and erect a one and a half storey extension to the rear of the property, install a new dormer window on the front west elevation and install rooflights to the north and south side roof slopes.

The proposals achieve a good standard of design, using materials which complement the existing materials. The extension will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extension is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours due to the distance between the dwellings. The distance to the neighbouring property to the north is sufficient to prevent a material loss of privacy from the proposed first floor rooflights.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
