Conclusion/Brief comment:

This application is to erect a first-floor extension above the utility room on the east side of the property, the extension will provide an additional bedroom and the new roofline will be seen from the front elevation.

The new roof line will mimic the existing, but will be slightly lower and hipped, using the same materials, giving a subservient appearance which blend well with the rest of the façade.

The proposals achieve a good standard of design, providing adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation by providing an additional bedroom.

The scale and massing of the proposals are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
