Conclusion/Brief comment:

This application was initially to alter the roof forms, install a chimney and extend and alter at ground floor level, install external insulating render system and alter some ground levels and landscaping. Widen the existing vehicle access and create additional vehicle access and parking to the south and east of the site.

The original proposal to introduce two additional vehicular accesses, entering to the south of the building and creating another parking area which then re-joined the road to the northeast of the site, raised concerns as it was considered to urbanise a fairly rural area by removing a large area of natural landscaping and adding retaining walls and paving.

The application was deferred to allow the applicant to reconsider the design. Amended drawings were received which have removed a driveway, retaining the majority of the existing hillside landscaping and a much smaller vehicle pull in area has remained where the redundant pool plant room will be removed. Although this is to the south of the property and forms part of the hillside landscaping which can be seen from the coast, the granite of the pool plant room will be replaced with the granite of the retaining wall behind it, so the long views would not change dramatically.

The rest of the proposals, including the alterations to the roof form are considered to achieve a good standard of design, using materials which complement the existing materials. The extensions and alterations to the fenestration will provide adequate levels of sunshine and daylight, and give the occupiers more flexible and adaptable accommodation.

The scale and massing of the new extensions are not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will they have any impacts on any of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
