OFFICER'S REPORT

Brief Description of the site:

The application site comprises a detached dwelling-house located to the west of Le Mont Durand. The site is located Outside of the Centres as designated in the Island Development Plan.

Planning permission is sought to partially demolish a conservatory, erect a single storey extension to the west (rear) elevation and east (front) elevation, and erect a carport to the south (side) elevation, and to make alterations to the fenestration.

The proposed extension to the front will serve as an extension to the existing playroom and hallway. Towards the rear of the property the conservatory will be removed and replaced with a sunroom with new block walls built off the existing dwarf walls, with a flat roof and roof lantern over.

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

The proposed extensions to the front and rear of the dwelling adopt a good standard of design in terms of their scale, mass, form, siting, materials and appearance. Both extensions would not have any detrimental effect on the character or appearance of the locality and relate well to the main dwelling.

Some concerns are raised over the roofing material used for the proposed car port given its visibility from the road. In particular, the road level is likely to be higher than that of the proposed car port roof, and therefore the incorporation of a single ply membrane roof would be visible in public views and is therefore not considered to achieve a particularly high standard of design. This aspect of the development would detract from the appearance of the area when viewed in context with the traditional roof forms and materials found on the main house. Nonetheless, the degree of harm would not be so substantial to justify refusal when taking into account the flexibility afforded to householder design, together with the position and limited footprint of the car port.

Although a landscaping scheme could be required by condition it is not considered necessary in this instance. It is also noted that these details are shown in association with a separate application (FULL/2022/2082) for the relocation of a vehicle access.

Overall, the proposal would not cause undue harm to the character of the area, visual amenity, or the amenities of neighbouring residents.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
