OFFICER'S REPORT

Brief Description of the site:

The property known as 'Thrillho' is an early 20th century two storey semi-detached property, located in a row of semi-detached properties to the south of Rue Des Grons, St. Martin. The other semi is attached to the west, and another pair of semi's are to the east and there are other detached residential dwellings to the south and a Clos to the north. The site is located Outside of the Centres in the Island Development Plan.

Conclusion/Brief comment:

This application is to remove 2.3m of front roadside earthbank to widen the existing pedestrian access to create vehicular access for parking.

The property is currently served by parking to the rear. The proposal seeks to remove a section of earthbank to create a parking area to the front. The adjoining semi had permission to create vehicle parking at the front of their property in 2021, so a precedent has been set, although it is not unexpected to see parking to the front of dwellings.

The earthbank at the front of the property forms part of a continuous earth bank running along the roadside boundary of the row of properties to the south of Rue Des Grons, broken by pedestrian accesses to the respective properties and the neighbours widened entrance. As such the removal of another section of this bank would not have a significant impact on the overall appearance of this earth bank.

As the property is not a protected building, nor is it located in a Conservation Area, more scope is given to householder development which is supported under Policies GP8 and GP13.

The removal of a small section of the earthbank (2.3m) is not considered to cause substantial harm to the visual amenity of the area to warrant refusal, especially as the site is not located within a sensitive area.

The lane to the north of the site is recognised as a 'neighbourhood road' and therefore traffic speeds and volumes are likely to be considerably less than experienced on other traffic hierarchy routes across the island. Consequently, the effect on traffic management and highway safety does not raise any significant concerns.

It is noted that the application site in question is served by two car parking spaces to the rear, however as there are no maximum car parking standards applicable to dwellings outside the centres, the creation of additional car parking spaces is not precluded.

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
