Conclusion/Brief comment:

The application is for the demolition of an existing glass house built to the rear of and adjoining a detached garage sited to the east boundary of the property adjacent to the roadside and its replacement with a garden room and attached pergola. An additional open sided pergola is also proposed to the south. Although the main building is protected the listing does not include this garage or glasshouse.

The single storey extension will be slightly wider than the existing glasshouse, with a dual pitched roof approximately the same height and pitch as the existing. The proposed extension will abut the high granite roadside boundary wall and the pitched roof will be visible above this. Rooflights are proposed to the west elevation only. The roof material proposed is natural slate which is traditional and will appear acceptable adjacent to the existing pantile garage roof. The attached open timber pergola extends 3m from the front elevation.

The separate pergola is located between the existing swimming pool and summerhouse, and is an open, timber construction 4.5m by 3m and 2.6m in height.

Positioned some distance from the main house the proposed developments are not considered to have an impact on the setting of the protected building, which itself has been significantly extended. The scale and location of the structures on site and the open land surrounding the buildings means that there would be no impact on neighbour amenity.

The proposal is considered to comply with the requirements of GP5, GP8 and GP13.

An informative note has been used to draw the applicant's attention to the location of the site within an Archaeological Area.

A statement to satisfy GP9 has been submitted.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
