Policies considered most relevant:

IP9 Highway Safety, Accessibility and Capacity

Conclusion/Brief comment:

The existing granite wall to the front of the property is considered to contribute to the character and appearance of the narrow rural road, therefore the development will have a negative effect on the locality. However, the degree of harm is low as only a very small section of wall is to be removed and the level of harm is not considered to be sufficient to rebut the general support in favour of householder development (Policy GP13 and IP9) when taking into account the reasonable aspirations of the property owner to widen the existing access to 4.9m to improve the ease of access given the narrow road. Overall, the design of the proposal achieves a good standard of design by retaining the granite wall, for the purposes of Policy GP8.

The proposal does not pose any serious highway safety or traffic management concerns.

The development will not adversely affect the amenities of neighbouring residents.

Consequently, the proposal is compliant with Policy GP1, GP8, GP13 and IP9.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
