OFFICER'S REPORT

Brief Description of the development:

Install cladding, erect signage to north and east of the building and within the car parking area detached from the main building north of Le Bouet. One of the signs to the east elevation is proposed to be illuminated. The application site is within the main centre outer area and is defined as a conservation area within the Island Development Plan.

Conclusion/Brief comment:

The new signage will replace existing signage although will introduce illuminated signage in the form of halo lighting within the COOP name sign proposed to be positioned to the east elevation Fascia. Although illuminated, it is not considered to have a significant negative impact on the conservation area given the surrounding uses and the residential use of the remaining building on the upper floors of the food store. A condition securing the switching off of the sign following shop closure will however be appropriate in this instance.

The cladding of the external fascia and columns of the building is acceptable.

The application is acceptable in relation to the above policies and other material planning considerations.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
