This application is to install a new roller door to the west elevation to connect the outside yard to the inside. Erect 2.4m Palisade Security fencing to the north, west and south of the rear outdoor area, including a gate on the south boundary, and resurface the outdoor area.

The outdoor area is part of the industrial estate and the land has a storage and distribution use class. Therefore the proposals are consistent with the use and considered acceptable in this instance.

The protected buildings (to the north of the outdoor area) have good rear boundaries, consisting of 2.4m high rendered walls and fencing. The proposals are not considered to impact on the setting of those Protected Buildings.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
