Conclusion/Brief comment:

This application is to alter the roof form of the main property from hipped to mono-pitch, to match the roof of the new extension.

The proposals achieve a good standard of design, using materials which complement the existing materials. The roof change will provide adequate levels of sunshine and daylight, contribute to the redevelopment and extension of the dwelling to offer occupants more flexible and adaptable accommodation.

The scale and massing of the new roof design is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impact on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

It is also noted that a minor alteration is proposed to the proportions of the shower room window in the north elevation of the building which represents a minor amendment to the scheme acceptable as it does not substantially alter the design, appearance or impact of the development.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
