Consultations:

The Office of Environmental Health and Pollution Regulation, 22/03/2023

"I have reviewed the proposed plans for the air conditioning unit at Camp Du Roi Stores, Camp Du Roi, Vale, and there are a number of issues of concern that I must raise.

There are a number of properties in close proximity to the proposed air conditioning unit. Calculations have been made to assess the noise level from the proposed air conditioning unit and it is believed that the noise level experienced by a local property could be up to 28dB. As such I would recommend the following condition.

- Noise associated with plant and machinery incorporated within the development shall be controlled such that the Rating Level, measured or calculated at 1-metre from the façade of the nearest existing noise sensitive premises, shall not exceed a level 5 dB(A) below the existing LA90 background noise level, including low frequency tones. Rating Level and existing background noise levels shall be determined as per the guidance provided in BS 4142:2014.

- The use hereby permitted shall not be operated except between the hours of 08:30 and 17:30 on Mondays to Saturday and not at anytime on Sundays, Bank or Public Holidays”.

Conclusion/Brief comment:

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

Provided that the noise levels do not exceed a level 5 dB(A) below the existing LA90 background noise level, the air conditioning unit is unlikely to affect the amenities of neighbouring residents and no additional restrictions are required regarding the hours of operation of the air conditioning unit.

The application is acceptable in relation to the above policies and other material planning considerations.
