Conclusion/Brief comment:

This application is to install two dormer windows to the north roof slope and one dormer window to the south roof slope, plus increase the size of the existing rooflight on the south roof slope and add a small rooflight to the east roof slope.

A pre-application had previously been submitted showing much larger dormer to the north and south elevations, it was advised that these were too large in scale and probably would not be supported. Since then the dormers have been reduced in size and are much more in proportion with the rest of the building.

Within the historic hill town 7 Le Coupee is a relatively low lying property, which is read against the taller buildings behind it, thus the roofline does not break the skyline, therefore the impact of the dormer additions is much reduced and is not considered to have any detrimental impacts on the special quality of the character and appearance of the surrounding conservation area.

The dormer additions are not considered to impact on neighbour amenity. The closest property to the west has east facing windows and the new dormers face north, however the views between the two windows would be very oblique and on balance not considered to cause detrimental overlooking. Plus the other levels of the two properties have the same window configuration.

The addition of the east facing rooflight is also not considered to impact on the character and appearance of the surrounding conservation area or on neighbour amenity, and therefore is acceptable.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
