Conclusion/Brief comment:

This application is to erect a single storey extension to the northwest elevation of the garage, erect external steps to the rear of the garage and slightly widen the vehicular

access by rebuilding the rear granite boundary wall and relocating the existing pedestrian gate.

The proposed extension, relocating the pedestrian gate and rebuilding the granite boundary wall will mirror the extension works to the adjoining garage to the southeast. There are three sets of single storey garages along St Stephen's Lane, with each pair having mirrored boundary treatments. These proposals will bring symmetry to the middle pair of garages.

As these works are to the rear of the properties and along a granite wall lined road, the proposals are not considered to have any detrimental impacts to the surrounding conservation area, nor will they impact on any neighbour amenity.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
