OFFICER'S REPORT

Brief Description of the site:

The application site is situated Outside of the Centres as defined in the Island Development Plan. The area of land in question comprises a Site of Special Significance (SSS).

The application has been supported by a letter from Agriculture, Countryside and Land Management Services (ACLMS) who manage the site.

GP9: Sustainable Development

Conclusion/Brief comment:

The Island Development Plan includes the designation of nine SSS's which have been identified as having outstanding botanical, scientific or zoological interest. The principle aim of Policy GP2 is to wherever possible ensure that development will not damage the special interest of a Site of Special Significance.

Due to the size and nature of the proposed development, the proposal is of a minor nature and is considered incapable of having a significant adverse effect on the special interest of the site in terms of its effect on wildlife. It is therefore not required to request an impact assessment of the likely impact on any aspect of the SSS. The proposal is not considered to be significant in terms of its scale, setting and appearance therefore a comprehensive landscaping scheme is not considered necessary in this case.

It is however recommended that appropriate conditions are attached to the decision to prevent the importation of material and requirement to clean tools and equipment, prior to entering the SSS in order to protect the biodiversity of the area. On this basis, the development is considered compliant with Policy GP2.

The position of installing a new bench in this locality is considered to serve a practicable purpose which is considered to be justified in light of Policy GP1.

The proposed bench will adopt a good standard of design for the purposes of Policy GP8 by virtue of its size and material and therefore will have a negligible effect on visual amenity. The proposed bench would not result in visual clutter detrimental to the open landscape concerned. Consequently, the design of the development is acceptable and accordant with the aims and objectives of Policy GP8.

Sufficient information has been submitted that has taken into account the criteria of Policy GP9 (Sustainable Development).

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.

Based on the above, the application is considered compliant with the relevant Island Development Plan policies; it is therefore recommended that planning permission be granted, subject to conditions.
