Conclusion/Brief comment:

This application is for some internal alterations and some alterations to the fenestration of the building.

A Statement of Significance was submitted along with a comprehensive Scope of Works, which included a photographic survey. The scope of works and survey have allowed for a thorough assessment and the alterations proposed are considered to be reasonable aspirations that outweigh the harm to the protected parts of the building and are considered to conserve the Conservation Area.

There is a vague note on the proposed floor plans regarding the oak studs under the ground floor stairs, the way it is worded could lead to their wholesale removal, a condition will be added to ensure that any compromised members are not removed without prior consent of the Authority.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
