Conclusion/Brief comment:

This application is to demolish the existing garden shed and fencing, relocate the position of a new shed to the southeast corner of the rear garden and replace the fencing with the gate on the north boundary. Install a flue to the north elevation of the dwelling and some alterations to the fenestration on the east rear elevation.

The proposals to change the rear elevation fenestration will provide adequate levels of sunshine and daylight, and allow inside/outside living. The flue is considered to be an appropriate change to this small bungalow.

The scale and massing of the new shed is not considered to have a detrimental effect on the character and amenity of the surrounding area, nor will it have any impacts on either of the immediate neighbours.

Confirmation has been received that the development proposed has been designed to take into account matters of energy efficiency and current Building Regulations in accordance with Policy GP9.

The proposals are considered to conform to the above policies of the Island Development Plan and grant of permission is recommended, subject to conditions.

All material considerations as set out in the Land Planning and Development (Guernsey) Law, 2005 and the Land and Planning (General Provisions) Ordinance 2007 have been taken into account in the assessment of this application.
